Letter of Recommendation for Bob Motherhead

I had a wonderful experience working with Bob Mothershead, at Patterson Dental, and would highly recommend him. I recently opened my new start-up dental practice after being an associate dentist for 13 years. I had a strong sense of what I wanted and a vision for what I wanted to accomplish, but many uncertainties on how the process would unfold. I had heard mostly negative things about the nightmares of taking on a big project like new construction of a dental office. After considering various dental design companies, I chose Bob because of his experience and his wonderful team. Robin Janowski, the designer, who works with him, was responsive, detailed, fun and a good listener. She gave me great feedback and was indispensable to the success of the project. The General Contractor that I chose, through his network, Frank Gonzales/GFI Construction, was also professional, honest and truly terrific. I can't say enough great things about Bob Mothershead and his team: calm, professional, relaxed, attentive, confident, experienced...and on top of that, just quality people to have in your corner. If I had to do it again, I would have no reservations going with them again. I am grateful that I now have a beautiful office that reminds me of what an amazing journey it has been with them. I get compliments on the quality of the workmanship and design of my office every day. I love going to work and being in my dental practice!
