I have now done two offices with Bob Mothershead, a small office twelve years ago and a large office that we just finished. Throughout both projects Bob was a consummate professional. From start to finish, he and Robin handled every detail. When I was having trouble with financing they introduced me to banks that could get it done. They made it so seamless that during construction I was able to manage the day to day of my practice and not worry about what was going on at the construction site. I was even able to go on vacation and not have to worry. The other amazing thing was that not only did the project get done before the designated date but we were also on budget.

I would highly recommend Bob Mothershead for any project! If anybody wants more details please call me (661) 832-5530.
