

In 2011 I decided to relocate my dental practice. I didn't know where to begin with this big change. I reached out to a number of dental companies for guidance and direction to make the best plan. Each company I called was excited to help with my dental equipment and supply needs. I realized something different when I contacted Patterson Dental Supply and they connected me with Bob Mothershead. Bob was not only interested in my dental equipment and supply needs. Bob was available to help me look for locations. Bob was ready to help with potential office layouts. Bob connected me with all the colleagues that I would need to successfully relocate my business and set up a well-designed office. Bob was available to check out the potential sites and with the design help of Robin Janowski, they were able to give me an idea of what each space could look like. This process was difficult and time consuming but Bob was ready and willing. While lease negotiations were happening, Bob and Robin designed an amazing office. Bob facilitated meetings with contractors who know how to do dental office setups. Bob was on top of each step as it happened. Any worry or concern that I had was immediately taken care of when I reached out to Bob. Bob had contacts to help with old equipment donation. I had the best experience and I owe it all to Bob Mothershead. Bob works with whatever budget you choose and makes it all happen with ease. I know I can call Bob anytime for anything and he will help me. He is dedicated, meticulous and thoroughly dependable. These are the traits you must have when you want to refurbish, relocate or start a new dental office. My new dental office was completed in 2012 and I couldn't be happier with my dental office; it is beautiful and well designed.

Thank you Bob Mothershead!!
